

- 01 **Versatile:** Additional swivel ells on both ends ensure easy installation in any configuration
- 02 **Reliable:** All models are built with airtight connection points to prevent leaks
- 03 **Adaptable:** Comes in 6" and 12" models to accommodate various spray and rotor applications

SJ SWING JOINT

Adjust Sprinkler Height and Position with Ease While Preventing Broken Risers

The innovative Hunter SJ Swing Joint is designed to make installation and maintenance simple. Its patented, fully adjustable design allows you to position the "T" facing sideways or in the preferred upright position for easy installation, retrofitting, and servicing. Unique swivel ells on both ends support any configuration for maximum flexibility, making it easy to overcome common challenges.

Available in 6" and 12" lengths with ½" and ¾" threaded options, the SJ Swing Joint works well for both spray and rotor applications. Whether you want to quickly adjust sprinklers to their proper height and position or service existing equipment without damage or excessive digging, the SJ Swing Joint is the ideal solution.
