Hunter®

New Products, Training, and Tools to Grow Your Business

Check out the latest additions to our professional solutions lineup in 2021 and see what's coming down the pipeline in 2022.

IRRIGATION INSTALLATION FUNDAMENTALS PROGRAM

IRRIGATION INSTALLATION FUNDAMENTALS PROGRAM

Give new employees the confidence they need to deliver results and contribute to the growth of your business. Offered at no cost, this comprehensive online Hunter University training:

- Introduces the various components and techniques required to successfully install an irrigation system

- Includes 11 self-paced videos that give learners the opportunity to study on their own schedule

- Awards participants who successfully complete the program a certificate to show off their achievement

THE VAULT

Unlock The Vault beginning in January 2022 to learn about Hunter products, engage in challenges, answer weekly trivia questions, and earn coins to win prizes. Inside the Vault, you can:

- Take advantage of exclusive opportunities to increase your skills and test your knowledge

- Earn bonus coins by participating in select Hunter training events, organising demos, and offering special product promotions

- Access valuable tools and information to help grow your business

CENTRALUS™ SOFTWARE UPDATES

Enable cloud-based control and water-saving features for ICC2 and ACC2 Controllers. Updated features include:

- Enhanced scheduling, cellular connection, and remote control and management capabilities

- Highly secure cloud access and map-based navigation

- Flow monitoring and reporting

- Alarms and detailed irrigation history reports with mobile text alerts

HYDRAWISE™ SOFTWARE UPDATES

Our newest additions to the industry-leading Hydrawise Platform include:

- A Suspension by Dates feature to cancel irrigation for upcoming events
- A Watchlist feature to help contractors manage key customers
- A Grow-In Programs feature with flexible start and end dates for newly established plants

HYDRAWISE HPC CONTROLLER ENHANCEMENTS

The modular HPC Controller is now more flexible than ever with higher station counts and simple two-wire capabilities:

- Compatible PCM-1600 Module allows for quick expansion up to 23 conventional stations
- PC-DM Module enables control for up to 32 stations using the popular EZ Decoder System (28 stations maximum if two-wire only)

X2™ CONTROLLER WITH WAND MODULE

The X2 Controller is now easier to install with the new built-in wiring compartment when hardwiring to primary power is required. The WAND Module now features Bluetooth technology to unlock these helpful features:

- Bluetooth tether for faster Wi-Fi setup
- Transfer X2 Controller programming to Hydrawise
- Rapid Programming™ Technology to copy X2 schedules in seconds
- Bluetooth remote when Wi-Fi is unavailable

Hunter®

ICC2 CELLULAR CONNECTION MODULE

This module adds more flexibility for connecting ICC2 Controllers to the Centralus Platform. Key benefits include:

- Cellular communication module for use with ICC2 Controllers and the Centralus Platform
- Secure, reliable internet connection without the need for Wi-Fi or LAN
- Preinstalled SIM card provides quick data activation and convenient service plan options
- Flow-monitoring capabilities via the cloud for system-level flow rates with automatic high-flow shutdown and alerts

NODE-BT BLUETOOTH® BATTERY-OPERATED CONTROLLER

The industry's easiest battery-operated controller to program now offers more contractor features to simplify management on and away from the site:

- Copy and paste schedules from controller to controller
- View and edit irrigation schedules offline
- Pre-download firmware updates when installing in remote areas
- Visual watering calendar

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG Inc. and any use of such marks by Hunter Industries is under licence.

WIRELESS HC FLOW METER

Designed for simple integration with the Hydrawise Platform, the Wireless HC Flow Meter Communication Kit:

- Maximises time, material, and labour savings for any new installation or retrofit project
- Delivers reliable flow data that saves water and protects landscapes when asphalt, concrete, or other hardscape is in the way
- Works with Hydrawise enabled HC, Pro-HC, HPC, and HCC Controllers
