

Irrigation Management Platform for ACC2 and ICC2 Controllers

Hunter®

Hunter's popular **ACC2** and **ICC2**Controllers are now web-enabled to provide a range of powerful and flexible remote irrigation management capabilities.

MOBILE-FRIENDLY

The mobile-friendly Centralus Irrigation Management Platform provides highly secure, comprehensive cloud-based control and monitoring features for the powerful and popular ACC2 and ICC2 Controllers. The connectivity allows you to view a controller's status, change settings, view forecasts, save water, and receive instant notification of important system alarms — all without costly and time-consuming travel and site visits.

USER-FRIENDLY

Simple screens with intuitive commands put powerful adjustments and remote control at your fingertips. From the user-friendly Centralus dashboard, it's now easier than ever to add alarm monitoring, location information, remote operation, and flow monitoring to compatible Hunter controllers. Centralus can be switched to over a dozen international languages.

FLEXIBLE CONNECTION OPTIONS

To upgrade to Centralus control, choose one of several connection options depending on site requirements and personal preference: wireless Wi-Fi, hardwired Ethernet (LAN), or 4G LTE cellular connection (data service plan required). Log in to the platform through your free Hunter My Account at **centralus.hunterindustries.com**. Direct feedback capabilities are built into the platform, so you can join the conversation and help refine Centralus' features and capabilities.

SECURE AND RELIABLE

Centralus is reviewed by independent security analysts to ensure that protection and privacy standards are stringently maintained, including hardware authentication.

CENTRALUS WEB-BASED IRRIGATION MANAGEMENT

Centralus Software Features

- Cloud-based control and monitoring for ICC2 and ACC2 Controllers
- Manage controller irrigation schedules, settings, and alerts from anywhere
- Real-time flow monitoring and reporting of system flow rates and totals
- Multi-day weather forecast based on controller location, including weather triggers for maximum water savings
- Automatic climate-based scheduling adjustments based on ET (evapotranspiration) when used with a Hunter Solar Sync® Sensor
- Full remote control capabilities for station and program operation, both via smartphone and ROAM/ROAM XL Remotes
- SMS text notification of critical alarms to your mobile device with detailed alarm logging of incidents
- User management functions, including controller sharing for crewmember access
- Wi-Fi or Ethernet connectivity to existing routers
- 4G LTE cellular connectivity options with simple service plan setup

Wi-Fi Features

 Secure, high-speed Wi-Fi connection with built-in antenna (802.11 b/g/n; 2.4 GHz)

WIFIKIT

A2C-WIFI

Ethernet (LAN) Features

Secure, high-speed Ethernet connection with RJ-45 connection to network

LANKIT

A2C-LAN

A2C-LTEM Cellular Features

- Secure, reliable 4G LTE cellular connectivity
- Preinstalled SIM card for quick and convenient data activation

A2C-LTEM

CELLKIT

Model	Description
WIFIKIT	Wi-Fi Communication Module for ICC2 Controller
LANKIT	Ethernet Communication Module for ICC2 Controller
CELLKIT	Cellular Communication Module for ICC2 Controller (service plan required)
A2C-WIFI	Wi-Fi Communication Module for ACC2 Controller
A2C-LAN	Ethernet Communication Module for ACC2 Controller
A2C-LTEM	4G Cellular Communication Module for ACC2 Controller (service plan required)

Helping our customers succeed is what drives us. While our passion for innovation and engineering is built into everything we do, it is our commitment to exceptional support that we hope will keep you in the Hunter family of customers for years to come.
